The Annual Quality Assurance Report (AQAR) of the IQAC
(For Universities)

Institutions Accredited by NAAC need to submit an Annual self-reviewed progress report i.e. Annual Quality Assurance Report (AQAR) to NAAC, through its IQAC. The report is to detail the tangible results achieved in key areas, specifically identified by the IQAC at the beginning of the Academic year. *The AQAR period would be the Academic Year. (For example, July 1, 2017 to June 30, 2018)*

1.4.2 How the feedback obtained is being analyzed and utilized for overall development of the institution? (maximum 500 words)

ABVSM&E – The school is in the process of developing structured feedback system. The school is also having frequent feedback system for Teaching – Learning process with various stakeholders like Industry, Students, Alumni and Parents.

CSMCH, SSS - Based on interaction we modify the pedagogy and transaction of reading materials.

SLS – Time to Time a Graduate Advisory Committee meeting with the students separately for both M.Sc. and Ph.D. is held. The feedback received from the students is discussed in the faculty meeting and necessary measures are taken to ensure the student concern, if any.

CHS, SSS – Students are asked to fill in feedback forms anonymously pertaining to readings, lectures, tutorial, topics, use of power points etc. in questionnaires administered during the end of term exams. Their feedback is used by teachers to carry out modifications of syllabi to suggest alternative readings, alter teaching practices where necessary, develop more accessible topics for tutorials and examinations and to prepare other teaching aids, using power point where necessary.

CSSP, SSS – SFC Committee meeting were regularly held, students feedback was received through the SFC and a suggestion box kept in the centre. Alumni and relevant industry representative were regularly invited to interact with the students. We also interacted with the parents and prospective students during the Jan-Jan JNU event. On the basis of feedbacks received we revised our curricula and designed our forthcoming academic events. After discussing in the SFC meetings, centre resolved the issues related to the functioning of the centre.

CCUS&LAS, SIS – Anonymous feedback is obtained from students in classrooms by some faculty towards the end of the semester through structured questions that also include suggestions for better interaction amongst students and student and teacher.

CITD, SIS – The individual course feedback received by the respective faculty members and individual faculty members are incorporated in the designing /revision of courses, teaching methods and evaluation/grading. General feedback from SFC is discussed in the centre committee meetings and responded to. Research feedback from the RACs is followed up by the students and the respective supervisors.

2.3.2 Students mentoring system available in the institution? Give details. (maximum 500 words)

CHS, SSS – At the PG level every student is assigned an Advisor and on an average every teacher is assigned four PG students. Students can meet the advisors during the assigned contact hours and in case of emergency they can be contacted anytime. At the research level, Supervisors are the assigned Mentors. The role of advisor/supervisor extends beyond academic matters to include attention to personal crises, should such a situation arise.

CSSP, SSS – All supervisors meet their research students in every month and discuss their research progress. All research students in the centre present their work in progress report before the faculty members and students. There is a research advisory committee for every student that meets once in a semester and counsels the student. The supervisors also keep the students aware on the UGC Regulations related to promotion of academic integrity and prevention of plagiarism in higher educational institutes, particularly for the theses, dissertations and research publication.

CCUS&LAS, SIS – Remedial courses are offered by the school/centre to improve the learning of students from the centre. Quality improvement strategy for teaching includes use of computer-based teaching e.g. PPTs and use of documentaries and films in addition to regular lectures /seminars/conferences. Students are asked to present papers in their respective disciplines. Some of our Ph.D. students have been selected as teaching assistance for mentoring and taking classes for designated core courses and the MA level. Students were encouraged to help group meetings online and form mentor-mentee groups. Some senior Ph.D. students were identified for assisting and mentoring the new students.

7.1.4 Inclusion and Situatedness

Enlist most important initiatives taken to address locational advantages and disadvantages during the year

Year	Number of initiatives to address locational advantages and disadvantages	Number of initiatives taken to engage with and contribute to local community	Date and duration of the initiative	Name of the initiative	Issues addressed	Number of participating students and staff

7.1.5 Human Values and Professional Ethics

IERB, JNU:

JNU is one of the regulatory mechanisms which builds capacities for a more meaningful interaction on the ground and facilitate international standards in research and publications. It's constituent elements and all the panelists are aware of the fact that for the advancement of knowledge, real life experimentation based research must go on. It is both an individual as well as an institutional responsibility to protect the biosphere, cause no harm through experimentations to any of its constituents, be it a human being or any other form of life.

Respect for human autonomy within non-maleficence & beneficence framework of research. Research should be scientific guided by true, non-biased and non-ideological declination.

Awareness on right collaborations, foreign funding and appropriate skill sets.

Code of conduct (handbooks) for various stakeholders

Title	Date of Publication	Follow up (maximum 100 words each)
Preparing with experienced IERB Members	To be published	-

7.1.6 Activities conducted for promotion of universal Values and Ethics

Activity	Duration (from-----to-----)	Number of participants

7.1.7 Initiatives taken by the institution to make the campus eco-friendly (at least five)

- Regular plantation drives are conducted
- Solar panels are set up in several hostels
- All grocery items are sold in paper bags, Plastic is banned on campus completely
- Regular awareness campaigns on how to conserve energy
- Proper segregation of bio-degradable and non-biodegradable waste takes place from the hostels as well as the faculty quarters.

7.2 Best Practices

Describe at least two institutional best practices

(Upload details of two best practices successfully implemented by the institution as per NAAC format in your institution website, provide the link)

CIS:

1. Online APAR for Non-Teaching staff: The electronic Annual Performance Appraisal Report is an online system based on the comprehensive performance appraisal dossier that is maintained for each member of Service by the State Government/ Central Government. The aim of the system is to facilitate the electronic filling of PAR by staff in a way that is not only user friendly but also allows to fill from anywhere anytime as per their convenience and is fully paperless.

PAR filling process starts at the beginning of the year. The PAR Manager creates the workflow of the individual officer. The custodian generates the PAR of the respective Organization officers and sends the blank PAR forms to the individual officer. The officer fills the PAR for further submission to his/ her Reporting officer. The PAR moves from Reporting officer to Reviewing officer and to Accepting officer mandatorily marking Confidential Record Section a slip.

2. The JNUs Digital Tracking System (DTS), a fully automated in-house developed software. The software uses work flow assuring speedy evaluation by the external and internal referee for thesis / dissertation. The software also helps segregating tasks in three categories:

- (a) Plagiarism check / similarity index qualified staff copy of the dissertation / thesis to be submitted along with the list of potential external examiners by the centre/school.
- (b) Choice of the evaluators from the provided list and obtaining the evaluation report alongwith recommendation within three months by certifying evaluators as an authorized / registered examiner of JNU DTS.
- (c) Forwarding the recommendations and detailed report to the centre/school to get the final result on the research for the degree as to M.Tech/M.Phil/Ph.D.

The software based evaluation stands unique because this imparts complete unanimity and full transparency by maintaining data and time wise records of various steps, take up accessed either as a soft form or printed and maintained in the system copy file form. This is expected not just to reduce the evaluation time but transform the process of thesis/dissertation evaluation with positive impact on the academic progression.

3. JNU has started Skype based thesis open defence viva-voce. Certainly this best practice has brought positive influence and reduces delay that was to some extent link on the date of viva-voce examination. Since examiners has to logon to his/her skype account and can see actual presentation of the examinee and at the same time address the concerned queries, listen to the answers given by the examinee alongwith the body language, which is also witnessed by the audience making it a complete viva-voce examination. However, the planning towards finding the time travelling and other aspects are not the requirements and helps therefore to accomplish viva-voce in a speedy manner.

4. Revised Online Faculty Recruitment Process: Online application form as per the latest UGC regulation for faculty recruitment for the post of Assistant Professor, Associate Professor and Professor was developed and online interview process for revised. The software has features on dash board that every desirous applicant unless completes the minimum essential qualification prescribed by the UGC will not be able to access the complete application form for the above post. This has reduced incomplete applications and applications which may have inaccurate information to be filled in the essential criteria. The online screening procedure is also integrated within this form as a separate task. Essentially a numerical summary of various fields those are to be used for calculation of Academic / research score is combined herewith. The summary sheet at a glance

helps the screening committee at centre / school to have an idea about the research / academic credential of the applicant and thereby assist committee to come to a consensus as to shortlist or reject the applicant. The interviews of all faculty recruitment positions were completely done online using the Zoom video conferencing solution in a seamless manner.

7.3 Institutional Distinctiveness

Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust (Provide the weblink of the institution in not more than 500 words)

The uniqueness of JNU is evident from its basic philosophy, policies and programmes which are spelt out and embodied in the University Act. Accordingly, the University has always striven to evolve such policies and programmes of study as would be a qualitative and distinct addition to the national resource base in higher education instead of reflecting mere quantitative expansions of the existing facilities. The University thus has been concentrating on programmes that are of relevance to national progress and development. In this regard, the University has taken the following initiatives:

A conscious effort has been made to promote ideas of national integration, secularism, scientific outlook, cosmopolitan and humanistic approach towards life.

The national character of the University has been maintained by selecting students and faculty from all regions of the country.

An interdisciplinary approach to teaching and research has been promoted in recognition of the fact that knowledge is indivisible and, accordingly, a structure of Schools and Centres of teaching has been established.

The emphasis on teaching and research in non-conventional areas has ensured that duplication of facilities available in other universities is avoided as far as possible.

Care has been taken to establish a model School of Language Teaching and Research in Indian as well as foreign languages with well-equipped language laboratories and Centres, where the study of the literature, culture and civilization of the countries concerned becomes feasible and effective.

A system has been evolved whereby main academic decisions, such as the courses to be taught, their content and the methods of evaluation, are taken by the teachers themselves.

Admissions are made entirely on merit through an open all-India Entrance Examination.

A Grievance Redressal Committee has been set up to promote cordial relations between the students and the University administration.

The entrance examination is conducted all over the country alongwith JNU EE.

8. Future Plans of action for next academic year (500 words)

CIS:

The digital infrastructure has become a Core Utility to each user of the University after the covid19 pandemic. Hence, in order to sustain the academic and administrative activities of the University through an online mode, the University has taken the following steps in consideration to suffice the future requirements of ICT:

- Availability of high speed internet as a core utility for delivery of teaching and learning.
- Implementation of a public cloud for supporting all administrative and academic activities, contents online through a single dashboard and data repository that is unique, lifelong, online and authenticable to every academic user.
- Safe and secure cyber-space for the University community.
- Digital literacy and digitally accessible of resources of the University Library.

School / Centre wise details are placed below:

CRCAS, SIS: Drawing on the best practices of the online teaching platforms across the world, the centre has endeavoured to make digital engagement an important component of the teaching mode as an additional tool supplementing class room teaching practices. This would enable students to remain connected with the learning process even during vacations, weekends and holidays thereby overcoming the constraints of geographical distance and other related challenges. Digital engagement has opened a floodgate of opportunities, one of which would be to organise lectures of retired senior teachers of the centre and school on a regular basis on themes of international relations and other related disciplines. The profound scholarship of the stalwarts in the field will be tapped through this mode and students would thus gain valuable exposure and knowledge. Create an online resource base specific to the specialization of the centre. The resource base would draw upon not just the resources available globally on Eurasian studies but would also include the centre's own contribution in the field through time bound quality publication of articles, books, monographs and commentaries. Introduce new courses in the field in alignment with the overall Foreign Policy Vision of the Country. To introduce specialized courses in areas such as Geopolitics, Energy, Gender Studies, Environment, Migration and Demographic issues with special focus on the Eurasian region.

CL, SLL&CS: The centre envisions to become the centre for excellence in academics despite the great dearth of the infrastructural support. We have managed to teach by bringing our own projectors to teach the students in the past. We, however, hope that the University will provide some basic facilities such as projectors and seminar hall and laboratory for acoustic phonetics.

ABVSM&E – School has plans to start MS in Management Short term online certificate courses on Social Entrepreneurship, Startups, Incubation, Research Methodology and Marketing Research.

CCUS&LAS, SIS – Emphasis to be given on training on 'ethics' in research. Organising FDP and enhancing student skills in research methodology through workshops. Arranging training through workshops for faculty at the centre level.

SPS – School of Physical Sciences is one of the leading departments in India both in terms of teaching and research. Most of the laboratories are well equipped with state of the art research instruments. The school has state of the art computing facilities and well equipped laboratories for Physics and Chemistry. The primary focus in would be to attract (both collective and individual entric) research grants in interdisciplinary areas of science that resonate with the priority areas advertised by the funding agencies of the GOI. School has recently started M.Sc. programmes in Chemistry and Mathematics and we would like to expand those programmes as well. To keep the students engaged and motivated, more emphasis will be laid on organizing focussed online webinar series in addition to conferences and regular seminars on specialized topics and invite eminent speakers to deliver the lectures.

CAAS, SLL&CS – In the Next year centre is planning to add a few online courses under Swayam as well as MOOC for larger benefit of the learners. It will help the students sitting in far flung areas to get benefit of the expertise which we have in the centre.

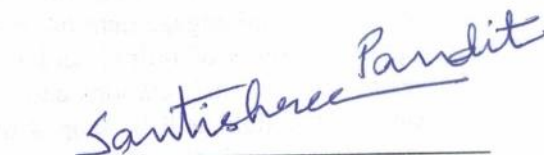

CSSP, SSS – Centre is in the process of setting up a South Asia Hub on Frugal Innovation Research in collaboration with centre for Frugal Innovation in Africa and Erasmus Leiden Delft Universities in the Netherlands. The collaborative research has been given priority to align with the international research agendas. The centre is planning to establish an Infographics Laboratory to promote information visualization and research data analytics and also to undertake advanced research in the areas of scientometrics, altmetrics and new age research evaluation metrics. This infographics Laboratory will be very unique within the Indian higher educational institutions.
